Who are the Techrangers?

The Techrangers are a part of Learning Systems and Technology at the Center for Distributed Learning (CDL) at the University of Central Florida. Since its formation in 1996, there have been over 50 Techrangers, mainly students, from various academic backgrounds including: Engineering, Computer Science, Humanities and Art. Several Techrangers have been promoted to full time positions within CDL after graduation. Others have pursued graduate degrees, careers at companies like Lockheed Martin, Northrop Grumman, Industrial Light and Magic, Cloudspace, Hostdime, Riptide Software, and Flocasts. Some former Techrangers have started their own companies such as Futhead and Revolution Industries.

Mission

The Techrangers team mission is to collectively enhance the online learning experience through our own education and technological advancement.

Duties

- Provide web development for UCF online courses, websites, and learning initiatives.
- Teach Tech Time classes to faculty, students, and other web developers.
- Uphold accessibility and web standard compliance in all content and projects produced.
- Learn, collaborate, and educate each other in a supportive team environment.
- Research and develop custom web applications that enhance online learning.
